

2.14.1 Bharti Airtel Limited

Brand Name: Airtel

Country of Operation: India

Company Profile: Airtel is India's largest integrated and the first private telecom services provider with a footprint in all the 23 telecom circles. Bharti Airtel since its inception has been at the forefront of technology and has steered the course of the telecom sector in the country with its world class products and services. The businesses at Bharti Airtel have been structured into three individual strategic business units (SBU's) - Mobile Services, Airtel Telemedia Services & Enterprise Services. The mobile business provides mobile & fixed wireless services using GSM technology across 23 telecom circles while the Airtel Telemedia Services business offers broadband & telephone services in 94 cities. The Enterprise services provide end-to-end telecom solutions to corporate customers and national & international long distance services to carriers.

Omani Qatari Telecommunications Company SAOC

Brand Name: Nawras

Country of Operation: Oman

Company Profile: A Qatari bird landed in Oman in 2004 when a consortium led by Qatar Telecom (Qtel) won the license to operate the second GSM network in the Sultanate. Branded as "Nawras" (an Arabic name for seagull), the Omani Qatari Telecommunications Company broke Oman Mobile's monopoly when it launched operations in March 2005. Within nine months of operations, Nawras attracted 244 thousand subscribers, grasping an 18% market share and becoming the first in Oman to offer a wireless Internet connection using EDGE technology. Its subscriber-base became more than doubled to 572,000. In the same year, Nawras became the first operator to activate 3G services in the country.

T-Mobile Slovensko, a.s.

Brand Name: T-Mobile

Country of Operation: Slovak Republic

Company Profile: T-Mobile Slovensko, a.s. is a leading telecommunications company in the Slovak Republic offering both mobile telecommunications services and managed data network services. The company's GSM and NMT mobile networks cover approximately 99% of the Slovak Republic's 5.4 million population. T-Mobile SK operates two networks - the digital GSM and UMTS. The GSM (Global System for Mobile) network was introduced in 1997 and is currently operated at 900 MHz and 1800 MHz. The managed data network services network is based on equipment from acclaimed companies such as Nortel, Cisco, Motorola, and Nokia and is based on international standards. Their MDNS network allows data transmission, value-added services, the Internet, satellite, corporate and virtual networks etc. services. Through its GSM and NMT systems, T-Mobile brings its customers the advantages of modern communications, offering a wide range of basic network and complementary services. T-Mobile's value added services expand the common uses of the mobile phone.
